Build a vibrant community that motivates employees and partners to join, learn and contribute in meaningful ways

A community is only as good as the contributions of its members. Bunchball Nitro for SAP Jam helps enliven your network by boosting participation, deepening employee engagement and driving productivity and focus. As members accomplish goals, gain status, and earn rewards, they become frequent and valued contributors, helping your organization engage the right people to drive innovation and deliver results.

Benefits

**Inspire productive collaboration**

- Promote positive team behavior and compel action
- Incent high performers with visibility and recognition
- Create achievable goals for incremental improvement
- Encourage healthy competition and collaboration

**Drive ROI for SAP Jam:**

- Accelerate new-member adoption and participation with pre-built missions
- Capture data to measure program effectiveness
Build a Vibrant Community

Nitro for SAP Jam helps you avoid the Achilles heel of social software: getting people to use it. Pre-built components and proven program designs quickly bring new members into the conversation and keep them engaged.

• Accelerate onboarding of new members with pre-built missions to capture their attention and keep it
• Inspire healthy competition and collaboration with virtual rewards and the ability to establish their community reputation
• Show members their progress and influence across their community in a personalized achievement center
• Establish SAP Jam as a gamification hub across the Enterprise by bringing other data sources into Nitro
Inspire Engagement with Targeted Challenges

Nitro for SAP Jam makes it easy to influence participation, and reward members who achieve business objectives and goals. Robust analytics help you refine and personalize your challenges to create the most business value.

- Get going quickly with ready-to-use missions, notifications, badges, and levels
- Gain insight into what motivates your members with robust analytics and expert reports
- Incent high-performing members with community visibility and recognition
- Deliver real-time recognition feedback with notifications surfaced within the SAP Jam user interface
Drive Mobile Workforce Collaboration and Productivity

Bunchball Nitro is the only gamification engine integrated directly into SAP Jam, providing a seamless user experience in the SAP Jam Mobile app.

SAP Jam Mobile app users are rewarded for joining conversations, commenting on and posting documents, photos and videos. Members stay motivated on-the-go, completing challenges, earning points, conquering missions and climbing leaderboards.

About the Nitro Gamification Platform

Bunchball is the leader and innovator of engagement technology powered by gamification. Purpose-built for the enterprise, Bunchball’s proven engagement solutions motivate employee, partner and customer behaviors while delivering the performance intelligence needed to drive business results. An early visionary, Bunchball wrote the book on gamification with the 2013 best seller Loyalty 3.0, and is widely credited for numerous market innovations, including a patent for Gamification as a Service. More than 400 enterprise customers rely upon Bunchball for the company’s expertise, innovations and proprietary analytics that deliver proven business results, and Bunchball is the partner of choice to industry leaders including Jive, SAP, Salesforce.com and NICE Systems. For more information, visit www.bunchball.com, read the blog at www.bunchball.com/blog, or follow @bunchball on Twitter.
