Datasheet
Nitro for SAP SuccessFactors Learning

Performance enhancing data helps you get the most out of your LMS and training resources

Want to drive better engagement for SAP SuccessFactors Learning? You may not realize it, but Bunchball Nitro for SuccessFactors Learning is part of the core functionality of the SuccessFactors Talent Management system you’re already using. That means you can add gamification and performance analytics to your LMS and training resources without any additional installation. All you need to do is configure your SuccessFactors Learning to integrate with Bunchball Nitro.

Benefits

With Bunchball Nitro for SAP SuccessFactors Learning, you can:

Enhance ongoing learning:

- Increase enrollment and improve completion rates
- Focus teams on priorities and goals
- Provide real-time feedback on performance metrics
- Recognize high performers and incent others to achieve the same
- Create achievable goals for incremental improvement
With Nitro for SuccessFactors Learning, you'll be able to drive meaningful engagement. That, in turn, can help you:

- Improve completion of mandatory and optional learning
- Enhance employee retention
- Increase compliance and expertise
- Demonstrate ROI for SuccessFactors Learning

Because Nitro for SuccessFactors Learning is fully integrated into the user environment, it's easy for employees to keep track of their accomplishments, chart their progress and view leaderboards to see where they stand compared to their peers.

### Improve learning KPIs, including:

- Onboarding time
- Customer satisfaction
- Compliance
- Retention
- Proficiency and expertise

### Drive ROI for SuccessFactors Learning:

- Integrates seamlessly with SuccessFactors Learning
- Maximizes adoption and inspires accurate data capture
- Provides greater visibility into forecasts, resource utilization, employee performance metrics and the motivation techniques that drive success
Nitro for SuccessFactors Learning is fully integrated into the administrator environment, as well. As a result, events are easily configured and tracked...

... and with just a few clicks, administrators can search and see all gamification activity that has occurred within SuccessFactors Learning.

About the Nitro Gamification Platform

Bunchball is the leader and innovator of engagement technology powered by gamification. Purpose-built for the enterprise, Bunchball’s proven engagement solutions motivate employee, partner and customer behaviors while delivering the performance intelligence needed to drive business results. An early visionary, Bunchball wrote the book on gamification with the 2013 best seller Loyalty 3.0, and is widely credited for numerous market innovations, including a patent for Gamification as a Service. More than 400 enterprise customers rely upon Bunchball for the company’s expertise, innovations and proprietary analytics that deliver proven business results, and Bunchball is the partner of choice to industry leaders including Jive, SAP, Salesforce.com and NICE Systems.
